

2009 RULEBOOK ADDENDUMS

The following rule will replace Rule 17.2.7 in the 2009 APBA Rulebook for rules under Drag Racing. The APBA will evaluate the different models of neck protection and their uses during the 2009 season and will re-evaluate mandatory use of these devices for 2010.

17.2.7 **Neck Protection** - It is highly recommended that neck protection be worn by the participants. Considering the fact that there is no safest neck protection device that will eliminate all risks, the participants are solely and ultimately responsible for selecting a suitable neck protection device that they feel will provide the proper safety protection for racing.
